RE: Spring Open House

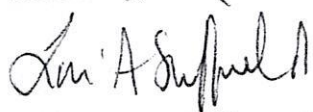

Dear Family and Friends of Agricultural Studies Academy,

We are pleased to announce that Ag Academy will be holding its Annual Spring Open House on Wednesday, April 27th, 2022 from 5:00 P.M.-7:00 to P.M. Ag Academy's farm and learning campus will be open to the community. We will highlight student learning through the completion of hands-on projects and work experiences and showcase our partners at the Cornell Cooperative Extension. Students at the Agricultural Studies Academy are immersed in a rigorous curriculum and instruction designed to develop skilled, motivated graduates who are prepared for college, careers, and life in the 21st century.

Visitors will have the opportunity to explore our classroom and workspaces, meet our highly dedicated staff, learn about the various agricultural topics we discuss with students from our component school districts, and share in our professional pride. Future Ag Academy students are encouraged to attend!

We look forward to seeing everyone on Wednesday, April 27th to showcase our learning space, our partnership with Cornell Cooperative Extension and the outstanding work we engage in to prepare our students for the future!

Sincerely,

Lori A. Sheffield, Agricultural Studies Academy Principal

Career and Technical Education innovatively prepares students for career pathways in the global marketplace by offering experiential learning, post-secondary credits and industry certifications. Students gain high-level technical and academic skills, equipping them to be lifelong learners.
